

Jet Rally on 19th September at KAMS

We were blessed with steady strong winds and sunny skies and it was great to have 15 pilots flying some 20 aircraft during the day. The day started at 9am with only 8 or 9 fliers, but by 11am this had grown to 15 and the total crowd to in excess of 50 adults and children. I noticed at one point the Canteen Manager rubbing his hands together with glee and he was eagerly making toasties and coffees for all, well done Malcolm.

We couldn't have asked for a better day to catch up with old friends and new from within the club and other Perth Clubs, who had made the journey to be there. At the end of the day, I began wondering if people were going to put away their planes, as most pilots took to the heavens on at least 3 or 4 occasions, with some like Wayne, putting on a show every time I turned around. You have got to love that smoke!

We saw some beautiful models on display, with Electric Ducted Fan aircraft also in common use this year. It is reasonable to say that during the course of the whole day, there would have only been a few moments here and there, where the air was empty, but mostly the sounds of turbines starting or flying was the order of the day.

I think the crowd was really enjoying the non stop action as they were still to be seen looking on intently at 4pm.

To those flyers who supplied the entertainment and the crowd for supporting the day, thankyou from KAMS.
